Panoramic Stereo Viewer

U.S. Government Order 2MP39723

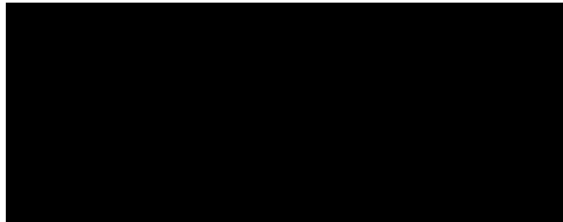

Monthly Progress Report  
Covering 19 July 1962 to 1 September 1962

During this reporting period, we have continued to investigate and select sources for the major components. A source for the glass cylinders has been contacted and cylinders to our specifications are readily available.

General design work is continuing to determine final configuration approaches and component placement.

During the next period, this design will continue and the optical design will be initiated.

No major problems have been encountered to date and no delays are anticipated.
